# The Chilcotin Ark

The wildlife of  
the Chilcotin Ark

11 of 29 of North  
America's big  
game species

12 out of 16  
biogeoclimatic  
zones of BC

largest water  
storage in western  
North America

17 parks and  
protected areas

## THE VISION

Is to manage winter habitats and ensure habitat connectivity to allow higher abundance of wildlife. This will help sustain viable populations within the Ark and increase their survival when facing the impacts of climate change, while ensuring locals can continue working and making a living in the Ark and working hand in hand with all the stakeholders in the region by following environmental, social, governance (ESG) – principles.
